
Take Combine Performance to the Next Level!

Maximize combine performance with the new FeedMacX™ Crop Feeding System on MacDon D1 Draper and FD1 FlexDraper® headers.

Designed to be custom configured to match any combine's performance capabilities, providing peak capacity, optimized feeding, and overall increased productivity. FeedMacX™ delivers up to 20% more capacity over the previous model, getting you the most from your field, in any crop, in any condition, and on any combine. Take your harvest performance to the next level with MacDon.
