

**NOTE:** For all 910 and 920 headers up to S/N 86399, modify conditioner feed pan by cutting at rear to dimension 19 as shown. Install rear cross channel 115754 (not part of kit). Position channel assembly to obtain dimension 400 to tine tips and drill 13/32 in. dia. holes through inboard face of lower leg as shown. Bolt channel assembly to legs.

**INSTRUCTION**  
(For 910 and 920 Auger Header up to S/N 116000)
